Discover all advantages
of ARIA ADURO

2 x FASTER
INSTALLATION

ARIA ADURO is **9 times lighter** than a traditional metal system, making installation much easier

ONE[®]
CLICK
technology

Proven solution:
OneClick technology

Thanks to the application of OneClick technology known from HEATPEX ARIA air distribution system, **connecting ARIA ADURO elements together is faster and easier than ever before.**

2 X LOWER
AIRFLOW
RESISTANCE

compared with flexible ducts:
quiet operation and lower maintenance costs

ARIA ADURO system is built from **rigid materials with smooth inner walls**

No risk of deformation during assembly – **constant cross-section all along**

Low noise level

HEATPEX

CONNECT

Semi-rigid ducting
system for air
distribution

ARIA
ADURO

Insulated
ventilation
ductwork

Complete system

ARIA ADURO is 100% compatible with HEATPEX ARIA air distribution semi-rigid ducting system

Standard dimensions

ARIA ADURO fits to most heat recovery units available on the market, its dimensions coherent with traditional ventilation systems. Internal dimensions comply with EN 1506:2007 standards.

ARIA

Elements of ARIA ADURO system

Connector

Connector (gasket included) – a simple push-fit connection. **Connector low profile does not alter the overall installation diameter.**

Special openings **indicate secure connection.**

Mounting bracket with adjustable band clamp

Application of ARIA ADURO

Alternative to spiro pipes.

Transfer of large air flows between:

- > air intake, outlet grille and heat recovery unit
- AND**
- > heat recovery unit and internal air distribution ducting system

High insulating properties

Light, durable and airtight material with excellent insulating properties

(EPS – expanded polystyrene), enriched with graphite – resistant to fungi, mould, and bacteria. Raw materials used along with added graphite **significantly increase the insulation coefficient: $\lambda=0.029$ (W/mK)**, especially when compared to wool-insulated metal pipes.

125
mm

160
mm

200
mm

Versatile system: 3 diameters

Reducer adjustable
to all diameters

Original mounting brackets for quick installation

- > **Quick installation** – simply attach the bracket to the surface, slide the pipe through and tighten the band.
- > **Modularity** – brackets, connected in series or in parallel, can be used for routing two or more ducts next to each other.
- > Ultra-light elements **require a minimum number** of mounting brackets.
- > **Versatility** – one size bracket for all 3 diameters.

5 cm

Effortless cutting – simple setup

Markers (every 5 cm) help cut the pipe to required length. Wall thickness of only 17 mm lets you easily cut the pipe, using a simple knife

ARIA Planner

 Design a heat recovery system in 10 minutes!

ARIA PLANNER – selection software, an easy tool that creates a bill of materials needed for each HRV project.

3 SIMPLE STEPS

STEP 1

Enter the list of rooms from your floorplan

ARIA PLANNER will **automatically select the size of the heat recovery unit and required air flows** depending on room type and number of occupants.

It will then **create air flow balance** for a harmonised supply and exhaust ventilation system.

ARIA PLANNER will also **determine the number of supply and exhaust points (diffusers) for each room** and calculate the number of required ventilation ducts.

STEP 2

Choose the type of connection to heat recovery unit – SIDE or CENTRAL

You will receive a list of components and air supply requirements, all tailored to your home design

Lista materiałów:		Cena włączona:		
Numer katalogowy	Nazwa	Liczba (sztuka)	Cena netto (PLN/szt.)	Wartość netto (PLN)
822 378 001	Skrzynka rozdzielcza	15	304,82	4572,30

830 075 000	Rura ARIA 75 - zwłok 50m	8	375,00	3000,00

STEP 3

Save and download your design

The design **contains calculated air flows, a bill of materials tailored to the selected configuration** as well as **guidelines on installation of the heat recovery system**. The document will indicate where and how to install diffusers, how to route ventilation ducts, and where to place the air intake and exhaust outlets. *
